About Me

M.Sc. student in Mathematics at Shanghai Jiao Tong University and Bai Xian Scholar, with experience in mathematics education, research-driven content creation, student leadership, and event coordination. Produces long-form educational content on Malaysian history, politics, economics, and society, with strengths in research, public communication, and cross-cultural collaboration.

WORK EXPERIENCE

Independent Content Creator

Bryan Ng 黄钲权 | 2025–Present

- Research, script, and produce long-form educational contents on Malaysian history, politics, economics, and society.
- Translate archival materials, public records, and complex political developments into accessible narrative content.
- Manage the full production process, including research, scriptwriting, visual planning, editing, publishing, and audience engagement.
- Built a cross-platform audience of 25,000+ followers, including 17,200+ followers on Instagram

Teaching Assistant

Expil | 2024–Present

- Support live Olympiad mathematics classes for international student cohorts.
- Track student learning progress and prepare performance updates for parents and instructors.
- Coordinate class communications and resolve operational issues to maintain effective student engagement.

LEADERSHIP EXPERIENCE

President

Mathematics Department Student Council, XMUM | 2024–2025

- Led a student council representing more than 200 mathematics students and strengthened communication between students and faculty.
- Organized more than six academic and peer-learning initiatives, including orientation activities, LaTeX and Lean 4 workshops, and mathematics study groups.

CONFERENCES & ACADEMIC ACTIVITIES

Participant

G2C2 Summer School and Conference, Hebei Normal University | Aug 2024

- Participated in lectures and collaborative sessions on graph theory, combinatorics, complexity, convexity, and related mathematical topics.
- Engaged with students and researchers from different academic backgrounds through workshops and group discussions.
